## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

## DETAILED ACTION

### *Election/Restriction*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13, drawn to a composition comprising an extract of *Vernonia amygdalina* leaves and a method of preparing the extract, classified in class 424, subclass 774, for example.
- II. Claims 14-22, drawn to a method of treating a neoplastic disease comprising administering a *Vernonia amygdalina* leaf extract, classified in class 424, subclass 725, for example.
- III. Claim 23, drawn to a peptide sequence, classified in class 514, subclass 13-15, for example.

The inventions are distinct, each from the other because of the following reasons:

Inventions I & III (distinct products) and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, there are numerous well known anti-cancer drugs useful for treating neoplastic diseases which do not require the extract product of Group I, nor the peptide(s) of Group II.

Art Unit: 1654

The products of Groups I and III are distinct, each from the other, because the product of Group I requires that it be a filtered water extract from the leaves of the claimed herbal plant, whereas the product of Group III does not. Conversely, the product of Group III requires a peptide of one or two particular sequences, whereas the product of Group I does not necessarily require such a peptide.

The several inventions above are independent and distinct, each from the other. They have acquired a separate status in the art as a separate subject for inventive effect and require independent searches (as indicated by the different classification). The search for each of the above inventions is not co-extensive particularly with regard to the literature search. Further, a reference which would anticipate the invention of one group would not necessarily anticipate or even make obvious another group. Finally, the consideration for patentability is different in each case. Thus, it would be an undue burden to examine all of the above inventions in one application.

Because these inventions are distinct for the reasons given above and the search required for each Group is not required for the other Groups, restriction for examination purposes as indicated is proper.
